

Minnesota/Wisconsin Training Reciprocity Agreement

Wisconsin Sustainable Forestry Initiative Implementation Committee

And

Minnesota Sustainable Forestry Initiative Implementation Committee

This memorandum is developed to help clarify responsibilities and reduce redundant training requirements for loggers in WI and MN.

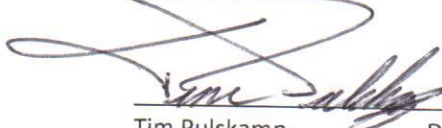

1. Qualified Logging Professionals (QLP's) as defined by the SFI 2015-2019 Standard in WI and MN are to maintain their trained status by an approved SIC training program in the State the QLP resides.
2. Training Standard requirements will be determined and approved by the State Implementation Committee (SIC) for each State.
3. Qualified Logging Professionals (QLP's) are to take the core requirements in the State in which they harvest:
 - a. WI – 2 day BMP training
 - b. MN – Online Forest Management Guidelines training
4. Continuing Education is accepted by either state as long as the training meets the training requirements of the SIC in the QLP's state of residence, and covers the SFI Fiber Sourcing Standard 6.2.1 and SFI Forest Management Standard 11.2.1 specified topics

This agreement may be renewed, modified or canceled by written notification by either SIC to the other SIC.
